2016/2017 Curriculum and Course Descriptions**

(Retrieved from <http://www.une.edu/registrar/2016-2017-academic-catalog/course-descriptions>)

Masters of Science in Applied Nutrition Curriculum

REQUIRED COURSES:

- APN 601 Trends and Issues in Nutrition and Global Food Systems
- APN 605 Nutrition Across the Lifespan (pre-req: 601)
- APN 610 Research Methods (pre-req: 605)
- APN 615 Nutrition and Metabolism (pre-req: 605)
- APN 620 Nutrition Education and Health Behavior Change (pre-req: 605)
- APN 625 Nutrition Practice for Health Promotion and Disease Prevention (pre-req: 605)

Degree Focus: Generalist

- Complete 6 required courses (APN 601, 605, 610, 615, 620 and 625)
- Complete 5 courses from APN 700 level course offerings
- Complete 1 Capstone course (APN 725 or 755)

Degree Focus: Business, Social Media, and Entrepreneurship

- APN 701 Nutrition, Wellness, and Multimedia Communication (pre-req: 605)
- APN 705 Online Research and Advanced Research Methods (pre-req: 605)
- APN 710 Media and Ethics in Nutrition (pre-req: 605)
- APN 715 Measuring Social Media Impact (pre-req: 605)
- APN 720 Nutrition Branding Using Social Media (pre-req: 605)
- APN 725 Entrepreneurship and Business Development (pre-req: 605)

Degree Focus: Obesity and Health Promotion

- APN 730 Medical Nutrition Therapy (pre-req: 605)
- APN 735 Nutrition Leadership, Community Nutrition and Wellness (pre-req: 605)
- APN 740 Nutrition and Nutrition Information in the Media (pre-req: 605)
- APN 745 Overweight and Obesity (pre-req: 605)
- APN 750 Clinical Management of Overweight and Obesity (pre-req: 605)
- APN 755 Applied Nutrition Capstone (pre-req: 605)

Degree Focus: Nutrition and Disease Prevention

- APN 730 Medical Nutrition Therapy (pre-req: 605)
- APN 760 Micronutrients: Nutrition and Functional Applications (pre-req: 605)
- APN 765 Nutrition Therapy for Clinical Practice (pre-req: 605)
- APN 770 Nutrition Counseling and Communication (pre-req: 605)
- APN 775 Advanced Nutrition Research (pre-req: 605)
- APN 755 Applied Nutrition Capstone (pre-req: 605)

Course Descriptions

APN 601 Trends and Issues in Nutrition and Global Food Systems

Current trends and issues relating to nutrition, food, and food products are examined. Topics may include the organic movement, nutrition and health related product trends in modern society, food and the economy, food politics and food labeling. Global food systems and trends will be explored. Socio-cultural and socioeconomic impacts on food behaviors and health will be discussed. Students will apply course concepts to their practice and/or area of study and expertise.

APN 605 Nutrition Across the Lifespan (pre-req: 601)

Nutrition requirements and metabolism from preconception through older adulthood are examined. The impacts and effects of culture, environment, economy and mental and physical health on nutrition status across the life cycle are explored. Metabolism of macronutrients, nutrition assessment methodologies, and specific concerns for each life cycle stage are emphasized.

APN 610 Research Methods (pre-req: 605)

Research methods and research design commonly used in nutrition research are examined. Topics include defining research questions, developing hypotheses, writing research goals and objectives, reviewing and interpreting literature, choosing appropriate research designs, and understanding and summarizing relevant data.

APN 615 Nutrition & Metabolism (pre-req: 605)

The metabolism of carbohydrates, protein, fats, vitamins, minerals, and water and the biological and physiological actions of these nutrients are examined. Topics include macronutrient and micronutrient absorption, transport, and excretion, the regulation of biochemical and enzymatic pathways, variability in the bioavailability of vitamins and minerals, and the impacts of nutrient toxicity and deficiency in humans and animal models.

APN 620 Nutrition Education and Health Behavior Change (pre-req: 605)

Health behavior theories and practices utilized to facilitate healthful behavior change in a variety of nutrition counseling and clinical settings are examined. Topics include motivational interviewing, practice of professional and engaged verbal and nonverbal communication, active listening, practitioner directed goal setting and group counseling. The design and evaluation of nutrition counseling practices are explored.

APN 625 Nutrition Practice For Health Promotion and Disease Prevention (pre-req: 605)

Nutrition and health promotion and the role of nutrition in disease prevention are examined. Topics include exploring theory-based approaches to lifestyle and behavior modification to advance the health and nutriture status of individuals and communities, development of culturally and age appropriate health promotion practices, current research on the ways diet, environment and nutrition influence the incidence and prevalence of chronic diseases at individual and population levels, and best-practices in health promotion. Students develop a practical approach to explore or address health promotion and disease prevention for a target population.

APN 701 Nutrition, Wellness, and Multimedia Communications (pre-req:605)

Strategic use of multimedia communications tools in the nutrition and wellness industry will be examined. Theories of mass communication, including contemporary perspectives and their application to current nutrition and wellness practice are emphasized. Topics include professional and ethical approaches to communication, multimedia writing, use of media for Integrated Marketing Communication (IMC), integration of marketing, and branding and public relations in multimedia and marketing campaigns.

APN 705 Online Research and Advanced Research Methods (pre-req: 605)

Conducting online research and advanced research methods will be examined. Appropriate use of qualitative and quantitative research designs and analyses will be emphasized. Topics include research population, valid and reliable measurement of research questions, analyzing and interpreting data and presentation of research.

APN 710 Media and Ethics in Nutrition (pre-req: 605)

Media organizations, their audiences and the ethics of advertising will be examined. Best-practices, transparency, and risk mediation in advertising will be explored. Topics include communicating best-practices to potential clients, the use of social media campaigns, accuracy in advertising, privacy, and trust and their application to the context of the nutrition and wellness industry.

APN 715 Measuring Social Media Impact (pre-req: 605)

Social media metrics used to inform marketing campaigns will be explored. Analyzing social media metrics and developing strategies for viable campaigns concerning nutrition and wellness will be emphasized. Topics include how to evaluate and manage the return on investment (ROI) of social media efforts and campaign strategy modification based on the outcomes of metric analysis.

APN 720 Nutrition Branding Using Social Media (pre-req: 605)

Integrated Marketing Communication (IMC) plans will be examined. Strategies to maximize the impact of social media on branding efforts, IMC analysis and approaches to increasing efficacy will be explored. Topics include how to map the landscape of social media, create branding strategies for social media marketing, audit the competitive landscape, assess the effectiveness of social media engagement, and determine appropriate tools for social media engagement and branding.

APN 725 Business Development and Entrepreneurship (pre-req: 605)

Small business development in the nutrition and wellness industry will be examined. Strategic decision making and leadership will be emphasized. Topics include the development of business plans, assessing the risk of business concepts, and identifying strategies for success in competitive, traditional and emerging markets. This capstone course will culminate in a business plan, feasibility study, market analysis report or other project or work-product approved by the Instructor.

APN 730 Medical Nutrition Therapy (pre-req: 605)

Nutrition principles, clinical nutrition assessment, therapeutic diets, and nutrition support in the treatment and prevention of disease will be examined. Topics include lifestyle strategies and nutrition

and therapeutic based interventions to correct nutrition insufficiencies, promote optimal health, and prevent, manage, or correct medical problems.

APN 735 Nutrition Leadership, Community Nutrition and Wellness (pre-req: 605)

Nutrition behavior, public health implications of nutrition status, nutrition education initiatives and leadership in the nutrition and wellness fields will be examined. Development of educational materials and programs for a range of settings will be explored and dissemination of professional education materials for a variety of audiences will be emphasized.

APN 740 Nutrition and Nutrition Information in the Media (pre-req: 605)

Commercial and media influence on concepts of health, wellness, nutrition and nutrition education will be examined. Commercialization and consolidation of food systems and the impacts on nutrition are explored. Topics include nutrition labeling, the impact of consumers and food businesses on food supply and policy, food lobbyists and policy practices impacting consumer habits, and media dissemination of nutrition information.

APN 745 Overweight and Obesity (pre-req: 605)

The epidemiology and economic, public health and psychosocial impacts of overweight and obesity are examined. Complications in management and treatment of overweight and obesity are explored. Topics include an introduction to current treatment strategies, educational and theoretical models used to combat overweight and obesity, and emerging research on the causes of obesity.

APN 750 Clinical Management of Overweight and Obesity (Pre-req: 605)

The etiology, management and treatment of overweight and obesity are examined. Treatment approaches including medical, behavioral and lifestyle management interventions are explored. Clinical management of overweight and obesity across the population will be emphasized. Topics include specific treatment strategies in managing overweight, obesity and related disease processes, implementing best-practices in a clinical environment, and appropriate and effective counseling modalities.

APN 755 Applied Nutrition Capstone (pre-req: 605)

The latest theories, research, policies and practices relating to a variety of nutrition concepts, controversies and practice will be applied to a relevant area of the student's choice and approved by the Instructor. This capstone course will culminate in a project or paper such as: a research paper addressing a clinical question or practice, modifications to current policy or practice, or proposals to implement new approaches to the management and treatment of a nutrition concern.

APN 760 Micronutrients: Nutrition and Functional Applications (pre-req: 605)

This course examines the role of micronutrients and micronutrient metabolism in human health and nutrition, specifically the digestion, absorption, transport, storage and excretion of vitamins and minerals. Homeostatic mechanisms and micronutrient interactions with dietary, organic and inorganic compounds will be explored. Topics will include micronutrients and medical nutrition therapy, micronutrient toxicity and deficiency, bioavailability of micronutrients and clinical implications of micronutrient status.

APN 765 Nutrition Therapy for Clinical Practice (pre-req: 605)

The epidemiology and etiology of nutrition-related disease will be examined. Dietary, lifestyle and behavior change approaches in chronic disease prevention and management will be emphasized. Disease prevention and management using dietary modification and specialized therapies will be emphasized. Topics include specialized treatment for the critically wounded or ill, nutrition-related disease prevention, nutrition therapies for genetic and chronic disease states and therapeutic approaches to disease management.

APN 770 Nutrition Counseling and Communication (pre-req: 605)

The role of the nutrition professional in promoting general health and wellness through a variety of communication methods will be examined. Theoretical models of nutrition counseling and behavior change and evidence-based nutrition intervention design strategies are emphasized. Topics include calculation of diet modifications for a variety of disease states, development of educational materials, techniques for communicating nutrition information to individuals, use of multimedia communication strategies, and culturally appropriate information dissemination strategies.

APN 775 Advanced Nutrition Research (pre-req: 605)

Critical review and evaluation of current nutrition and wellness literature will be examined and performed. Quantitative research methods including research design, data analysis and interpretation of findings will be explored. Topics include continuous quality improvement (CQI) processes, appropriate research design and data analysis methods for a variety of nutrition research initiatives.

Notice and Responsibilities Regarding this Catalog

<http://www.une.edu/registrar/2016-2017-academic-catalog/graduate-catalog>

This Catalog documents the academic programs, policies, and activities of the University of New England for the 2016-2017 academic year. The information contained herein is accurate as of date of publication April 29, 2016.

The University of New England reserves the right in its sole judgment to make changes of any nature in its programs, calendar, or academic schedule whenever it is deemed necessary or desirable, including changes in course content, the rescheduling of classes with or without extending the academic term, canceling of scheduled classes or other academic activities, in any such case giving such notice thereof as is reasonably practicable under the circumstances.

While each student may work closely with an academic advisor, he or she must retain individual responsibility for meeting requirements in this catalog and for being aware of any changes in provisions or requirements.
