Revision of Code Books

Dr. Hardy has been a moving force in practically all things scientific in the advancement of education for both staff and trainees (internes and Res) since the hospital was opened in 1937. He has ever been dissatisfied with the "status quo" and from his efforts have come many major changes in the entire picture of 'improving patient care' in this and other areas. He has ever aggitated for improved surgical care both pre and post-operative and he has been an example in demanding exhaustive case work-up before surgery lest hasty or un-necessary surgery be done.

In all the above Dr. Hardy has not always been 'right' in the argument sence but in sometimes being ~~was~~ wrong he has provoked other into action to help further constructive ~~mission~~ effort for patient care and professional education

IN MY OPINION DR. HARDY MERITS CONSIDERATION FOR RECOGNITION BY THE A.O.C.S

M.C.P.
