The clinical relevance of ectopic axonal sensitivity

Geoffrey M. Bove, D.C., Ph.D.
Professor, Department of Biomedical Sciences, College of Osteopathic Medicine, University of New England

Dr. Geoffrey Bove graduated from the Canadian Memorial Chiropractic College in 1998, and was awarded his Ph.D. in anatomy and neurobiology by the University of North Carolina in 1994. Dr. Bove's primary research interest focuses on the effect of inflammation and altered axoplasmic flow on nociceptor axons.

The results of his research, coupled with human anatomy and biomechanics, inform recognition and clinical diagnosis of radiating pain. This seminar will present the translation of basic science research into clinical practice.
