Region 15 Nursing Research Symposium, October 11, 2019
Podium Break-Out 2: Leadership
Time: 9:30 - 10:30 AM
Learning objective:

- The learner will be able to identify seven major themes affecting succession planning, which emerged through interviews with nurse managers and nurse directors.
Background

• A severe nursing shortage is predicted by 2020[1-3], and just as alarming, is the likely shortage of nurse managers and nurse directors. [4]

• Effective succession planning for nurse leaders affects recruitment and retention, patient outcomes, staff engagement, and finances. [1, 5]

• Preparing successors for leadership is imperative for hospitals to surmount challenges today and in the future. [1-5]
Overview of the project

• Succession planning for nurse managers and nurse directors was identified as the subject for my capstone project.

• The focus of interest was to discover first-hand challenges of succession planning and opportunities for developments.

• An extensive literature search was first conducted using databases (PubMed, CINAHL, Ovid) and the internet (Google Scholar) for articles written between the years 2011 to 2017.

• Out of the found articles, 24 articles were reviewed and selected on their strength of evidence, clinical significance of the results, or expert assessments.
Design/Implementation:

- A total of 5 nurse managers and 6 nurse directors from 2 different service lines volunteered for a discussion style interview (2/17/17 to 3/28/17).
- The individual, discussion style data collection method was chosen to maintain confidentiality and promote open communication.
- Four questions were asked (Figure 1.) and detailed notes were written during the discussions.
- After each interview, the written notes were reviewed, and typed notes were made, with details added as necessary.
- Each interview was analyzed thematically, using open coding.
- Key themes were identified and highlighted.

FIGURE 1. Interview questions

**Interview questions:**

- What are challenges that you can identify in performing your role as a nurse manager/nurse director?
- What suggestions do you have to improve the role of nurse manager or nurse director?
- What type of training or orientation did you receive when you took the role?
- What suggestions do you have to improve succession planning for your role?
Findings

- Seven major themes and 18 sub-themes emerged from the discussions as shown in Table 1.

- These themes identified through the conversations were also supported through the literature review.

<table>
<thead>
<tr>
<th>Major themes</th>
<th>Subthemes</th>

<td>• Follow-up with dialogue</td>
</tr>
<tr>
<td></td>
<td>• Mentorship program</td>
</tr>
<tr>
<td>Controlling work-life balance</td>
<td>• Managing stress and self-care</td>
</tr>
<tr>
<td></td>
<td>• Setting boundaries for working hours</td>
</tr>
</tbody>
</table>

Discussion

• It is imperative that we recognize the importance of frontline nurse leaders to the overall success of health care organizations.

• Building talent pools of nurses willing to learn leadership skills and implementing well-conceived, non-fragmented succession planning programs are necessary for hospitals to succeed in today’s rapidly changing healthcare arena.

• Findings from an international nursing management wellness survey in 2017 reflect similar aspects found in my project: nurse leaders’ working hours, making time for vacation, family, friends and self-care. [7]

• In the US, the ANA has developed the Healthy Nurse Healthy Nation Initiative which focuses on helping nurses build resilience and prevent burnout. The emphasis of the ANA’s program reflects needs discussed by participants in my project. [8]
