**Eat Right!**

Choose bright colored fruits and vegetables. Eating a wide variety of brightly colored foods gives your body all the vitamins and minerals it needs to be healthy and strong. Spinach, tomatoes, pineapple, and oranges are all great choices.

* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calorie a day is used for general nutrition advice.

**Eat more meals with your family.** This will help the whole family join in a healthy eating.

**Drink Water**. This will help keep you hydrated and also can help limit snacking desires.

**Be a Healthy Leader**

Be an example to your friends on what a healthy and nutritious diet looks like and encourage them to join in your journey to a healthy life.

This source may help Jane understand why she is obese. It looks at genetic as well as environmental factors that can lead to obesity as well as ways in which obesity can be solved. This book can help Jane realize that her weight might not be entirely her fault but provide answers as to ways in which she can solve the issue. The book can help her and her family discover ways to help their unhealthy eating habits together.

This article helps to explain some healthy behaviors that are linked to better school performance. Although there is no proof of causation Jane can benefit from knowing certain actions with health and nutrition can benefit her academically.

This article focuses on the environmental factors that impact health. Family time increases healthy eating behaviors and lessens, often times, the amount of eating out. This can be extended into the neighborhood as well. If the neighborhood eats well the household will eat better. This might also work for friends, eating what those around you are eating. This also looks at locations that are not filled with temptation like convenience stores and lost of fast food restaurants but rather grocery stores and farmers markets.

Sodium is a major issue with kids and especially Jane. This provides a few suggestions on monitoring sodium intake and also offers additional resources for minimizing sodium in a diet.
